

InVent

Innovative Odor Control

InVent

Innovative Odor Control

Introducing a solution for those difficult areas: high ceilings, corridors and extra large spaces

Go green and keep it simple with the Hyscent InVent, an odor control device that works with your existing HVAC airflow. Just clip the InVent into a ceiling vent in the space you'd like to fragrance to generate airflow through the unit. In minutes, notice the pleasing aroma of one of Hyscent's original fragrances. The sleek and aesthetically appealing design creates a virtually seamless appearance.

Environmentally Friendly

- No batteries
- No aerosols, harmful solvents or propellants
- Uses natural fragrance and essential oils
- Unit is recyclable

Odor Neutralization

- Attack and neutralize malodors with Odorax[™]

Save Time

- Replace unit in seconds, with easy clip on feature

Simple to Operate

- No programming required

Aesthetically Sleek

- Virtually invisible when clipped onto air vent

High Fragrance Output

- Fill an area with fragrance in minutes

Flexible Use

- Can be clipped onto a wall mounted or floor vented AC
- Or be clipped behind venting panels for security

Hyscent fragrances are made from natural fragrance and essential oils and are synergistically formulated with Odorax[™], a Malodor Technology scientifically designed and tested to effectively counteract unpleasant odors.

Dry Refill

No spills, no mess. Its safe, simple and effective to use. The InVent can be changed in seconds.

For Difficult Spaces

Just clip into a ceiling or wall vent and let the InVent go to work. In a matter of moments, the selected area will be suffused with pure fragrance oil based fragrances.

Environmentally Friendly

HYscent refills are made from a proprietary medical grade blended polymer infused with natural fragrance and pure essential oils. The absence of propellants and harmful solvents make HYscent refills the "eco" conscious solution for your fragrancing needs. Your customer will smell only pure fragrance oil and NOT propellants and harmful solvents that diminish the character and efficacy of the fragrance.

Versatile

The InVent uses the HVAC, wall mounted AC or any air source to deliver fragrance. Once clipped into the air flow source, the InVent will fill the space in a matter of moments. The strength and time of the operation of the air flow will determine the size of the space fragranced as well as the longevity of the InVent. When finished, recycle your InVent and clip in a new one.
